Decisions of Multi-Stakeholder Meeting

- Need to build up the capacity of farmers, private sector, officers of DLS and NGOs those are related to dairy sector.
- To continue AI according to cattle size and to follow national cattle breeding policy.
- To produce and collect hygienic milk form small farmers and farms.
- To give emphasis on milk product and diversification of milk product.
- To give emphasis on animal health.

- Buffalo can play a vital role to increase milk production. In this regard we need to exchange views among the member countries who have developed buffalo for increasing milk production.
- Sharing experience and visit between Dairy Asia member countries.
- Importance should be given for high yielding fodder production and balanced concentrate feed for Livestock.
- Raising of fund has been discussed thoroughly in the stakeholder meeting. Stakeholders are concerned about funding and they have decided this point would be finalized in the next meeting.

Department of Livestock Services has the following projects for development of dairy

- Integrated Agricultural Technology Project (NATP).
- Breed Up gradation Through Progeny Test Project.
- Buffalo Development Project.
- Establishment of Institute of Livestock Services and Technology Project.
- South-West Regional Livestock Development Project.
- AI Activities Expansion and Embryo Transplantation Implementation Technology Project.
- Nutrition Development and Technology Transfer Project.

Three Pillars

1. Capacity Building

- Training- Farmer (Small, Medium and Large)
- Officer (DLS and NGO'S)

2. Quality Feed

- Fodder production
- Concentrate feed

3. Hygienic milk collection and milk product

- Proper collection
- Processing
- Marketing

Data available and monitoring mechanism

Collection of Data:
